Vision

 Increasing human capabilities through an **proactive personal assistant** that tells you **what you need to know** and do, and helps you **get it done**
Search-less search

... most people don't want Google to answer their questions. They want Google to tell them what they should be doing next.
It should just wake up and do it
It knows you well enough it can proactively offer suggestions.

From: Jill
Sub: Heya!!

- Can you pick up the kids?
- Since you'll be near the pharmacy too, could also pick up the kids prescription?
- Please get some maple syrup, pancakes and strawberry cheese cake from The Oven.

From: Colin Smith
Sub: Client visits

- Is the marketing presentation ready for review?
- Remember to get Gary and Andrea along.
- Also please suggest a place where you think we should meet
A robot …

must **obey the orders** given to it by human beings
A robot …

must **obey the orders** given to it by human beings, except where such orders would conflict with the First Law.
A robot …

1. may **not injure** a human being or, through **inaction**, allow a human being to come to harm.

2. must **obey the orders** given to it by human beings, except where such orders would conflict with the First Law.
Asimov’s 3 Laws of Robotics

A robot …

1. may **not injure** a human being or, through **inaction**, allow a human being to come to harm.

2. must **obey the orders** given to it by human beings, except where such orders would conflict with the First Law.

3. must **protect its own existence** as long as such protection does not conflict with the First or Second Laws.
