

Would you care to try a Chardonnay?

The challenges of building Margot, the chatbot sommelier

Dr. Lisa N. Michaud
Director, Natural Language R&D
Aspect Software

??

??

??

Introduction to Margot

Great success selling wine

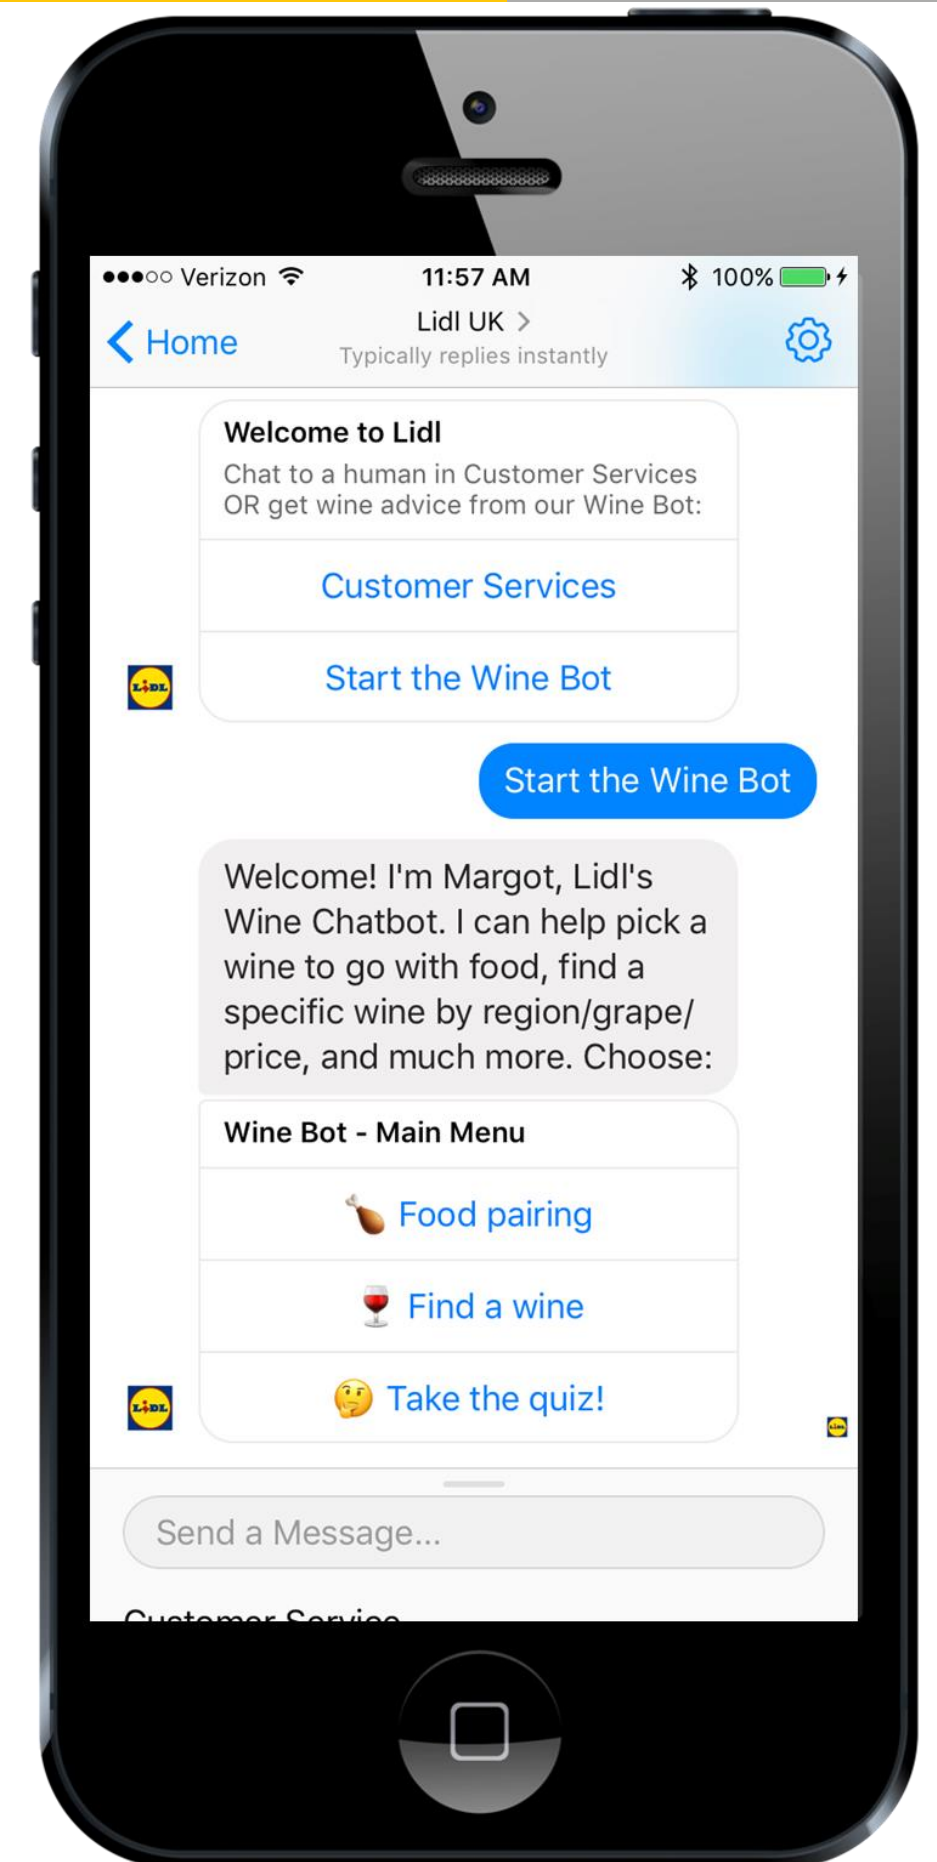

800+ stores

Few human in-store resources

How to share expertise?

Introduction to Margot

Place an AI on every mobile

Scales as needed

Food pairing

Wine selection search

FAQs and Quiz

Balancing NLU and Buttons

Faster than typing

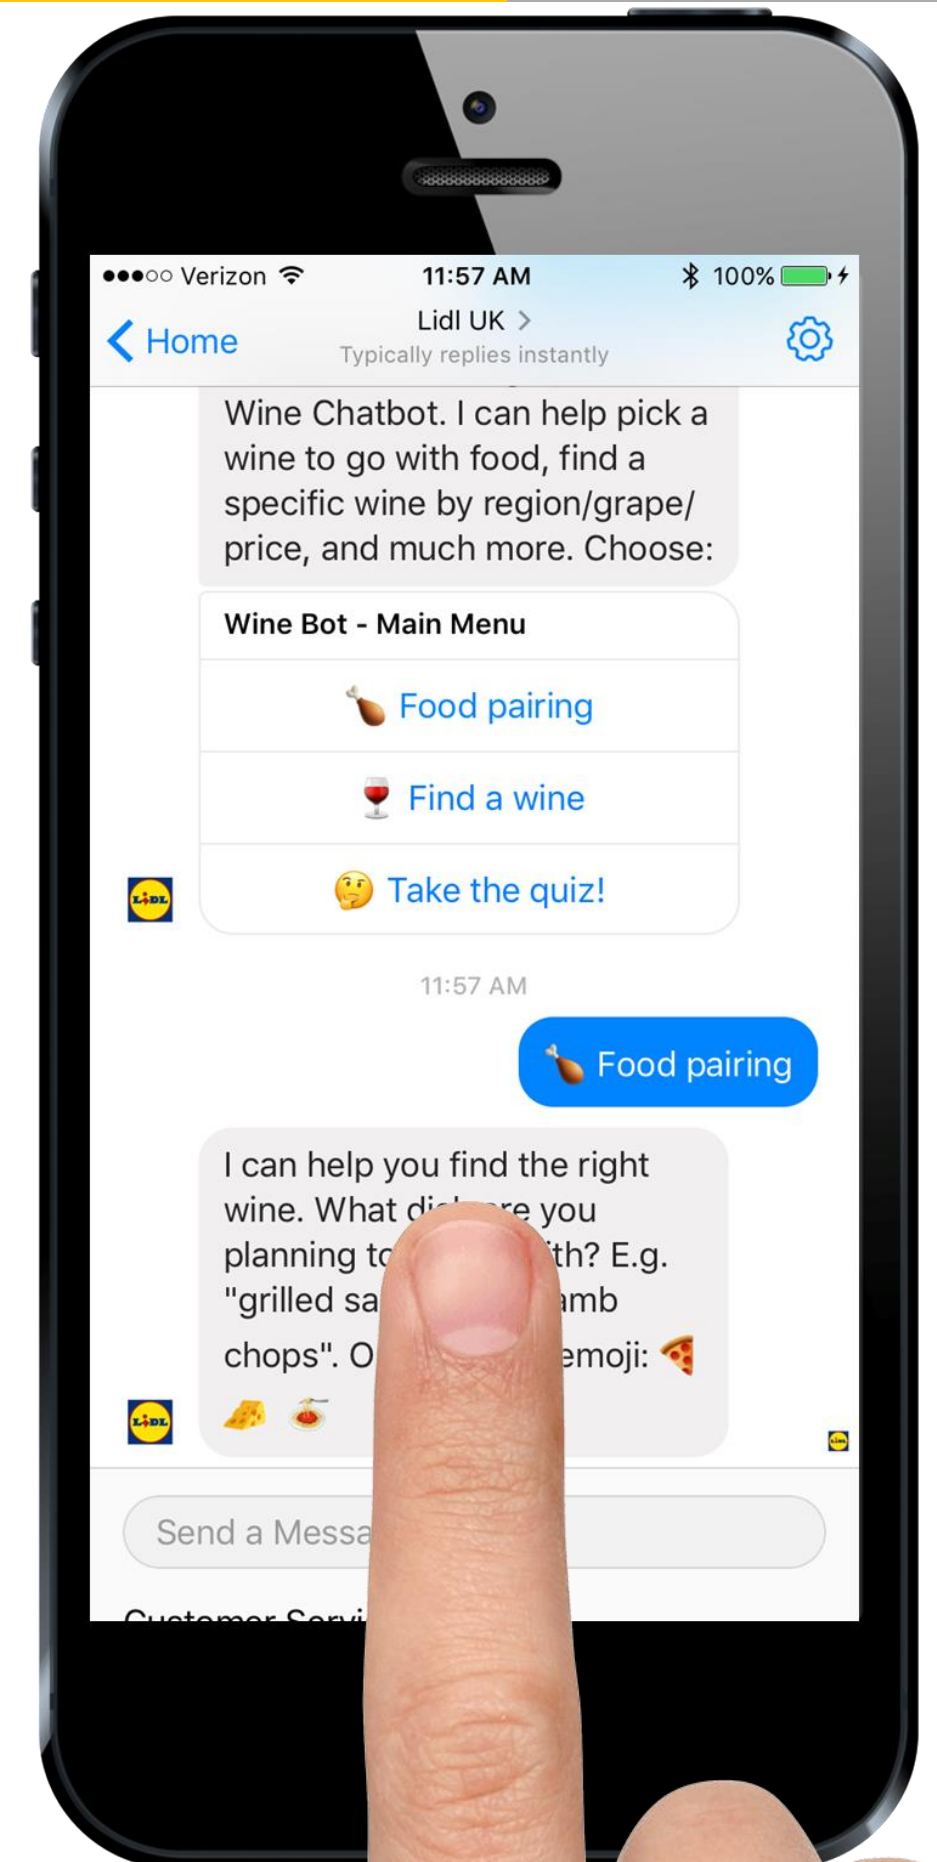

Unambiguous

Buttons do not work for:

- 200+ wine pairings
- Large sets of Frequently Asked Questions
- Follow-up questions

Balancing NLU and Buttons

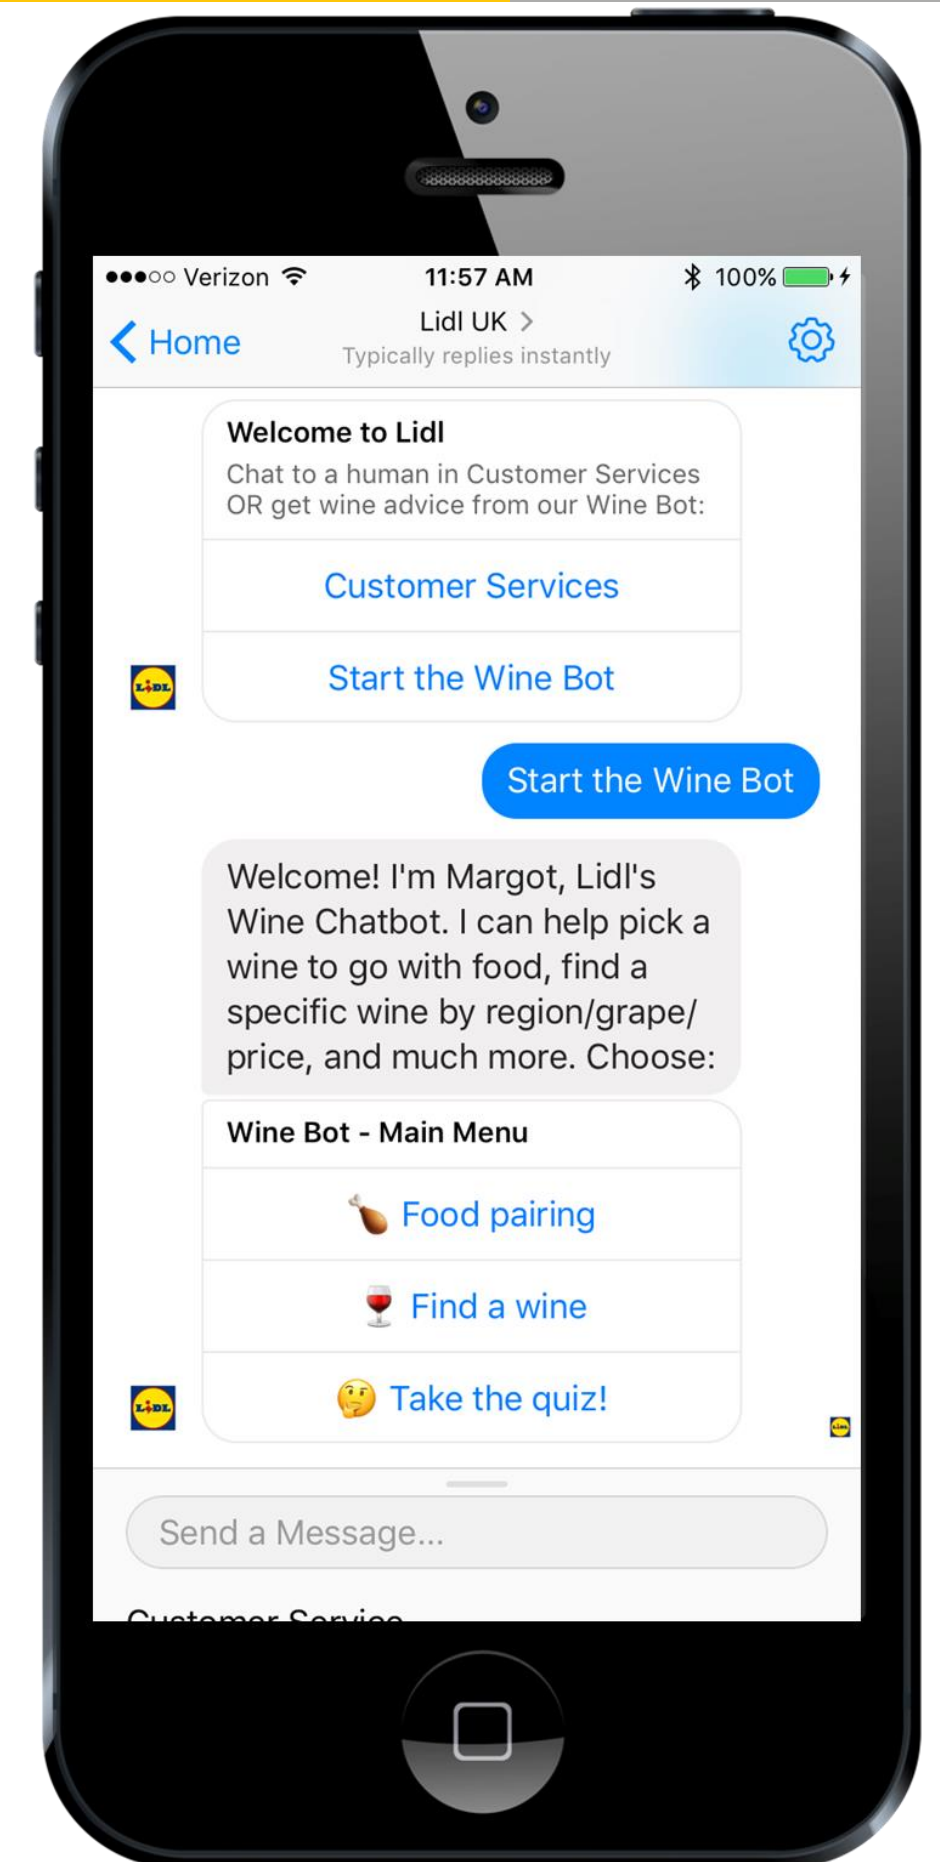

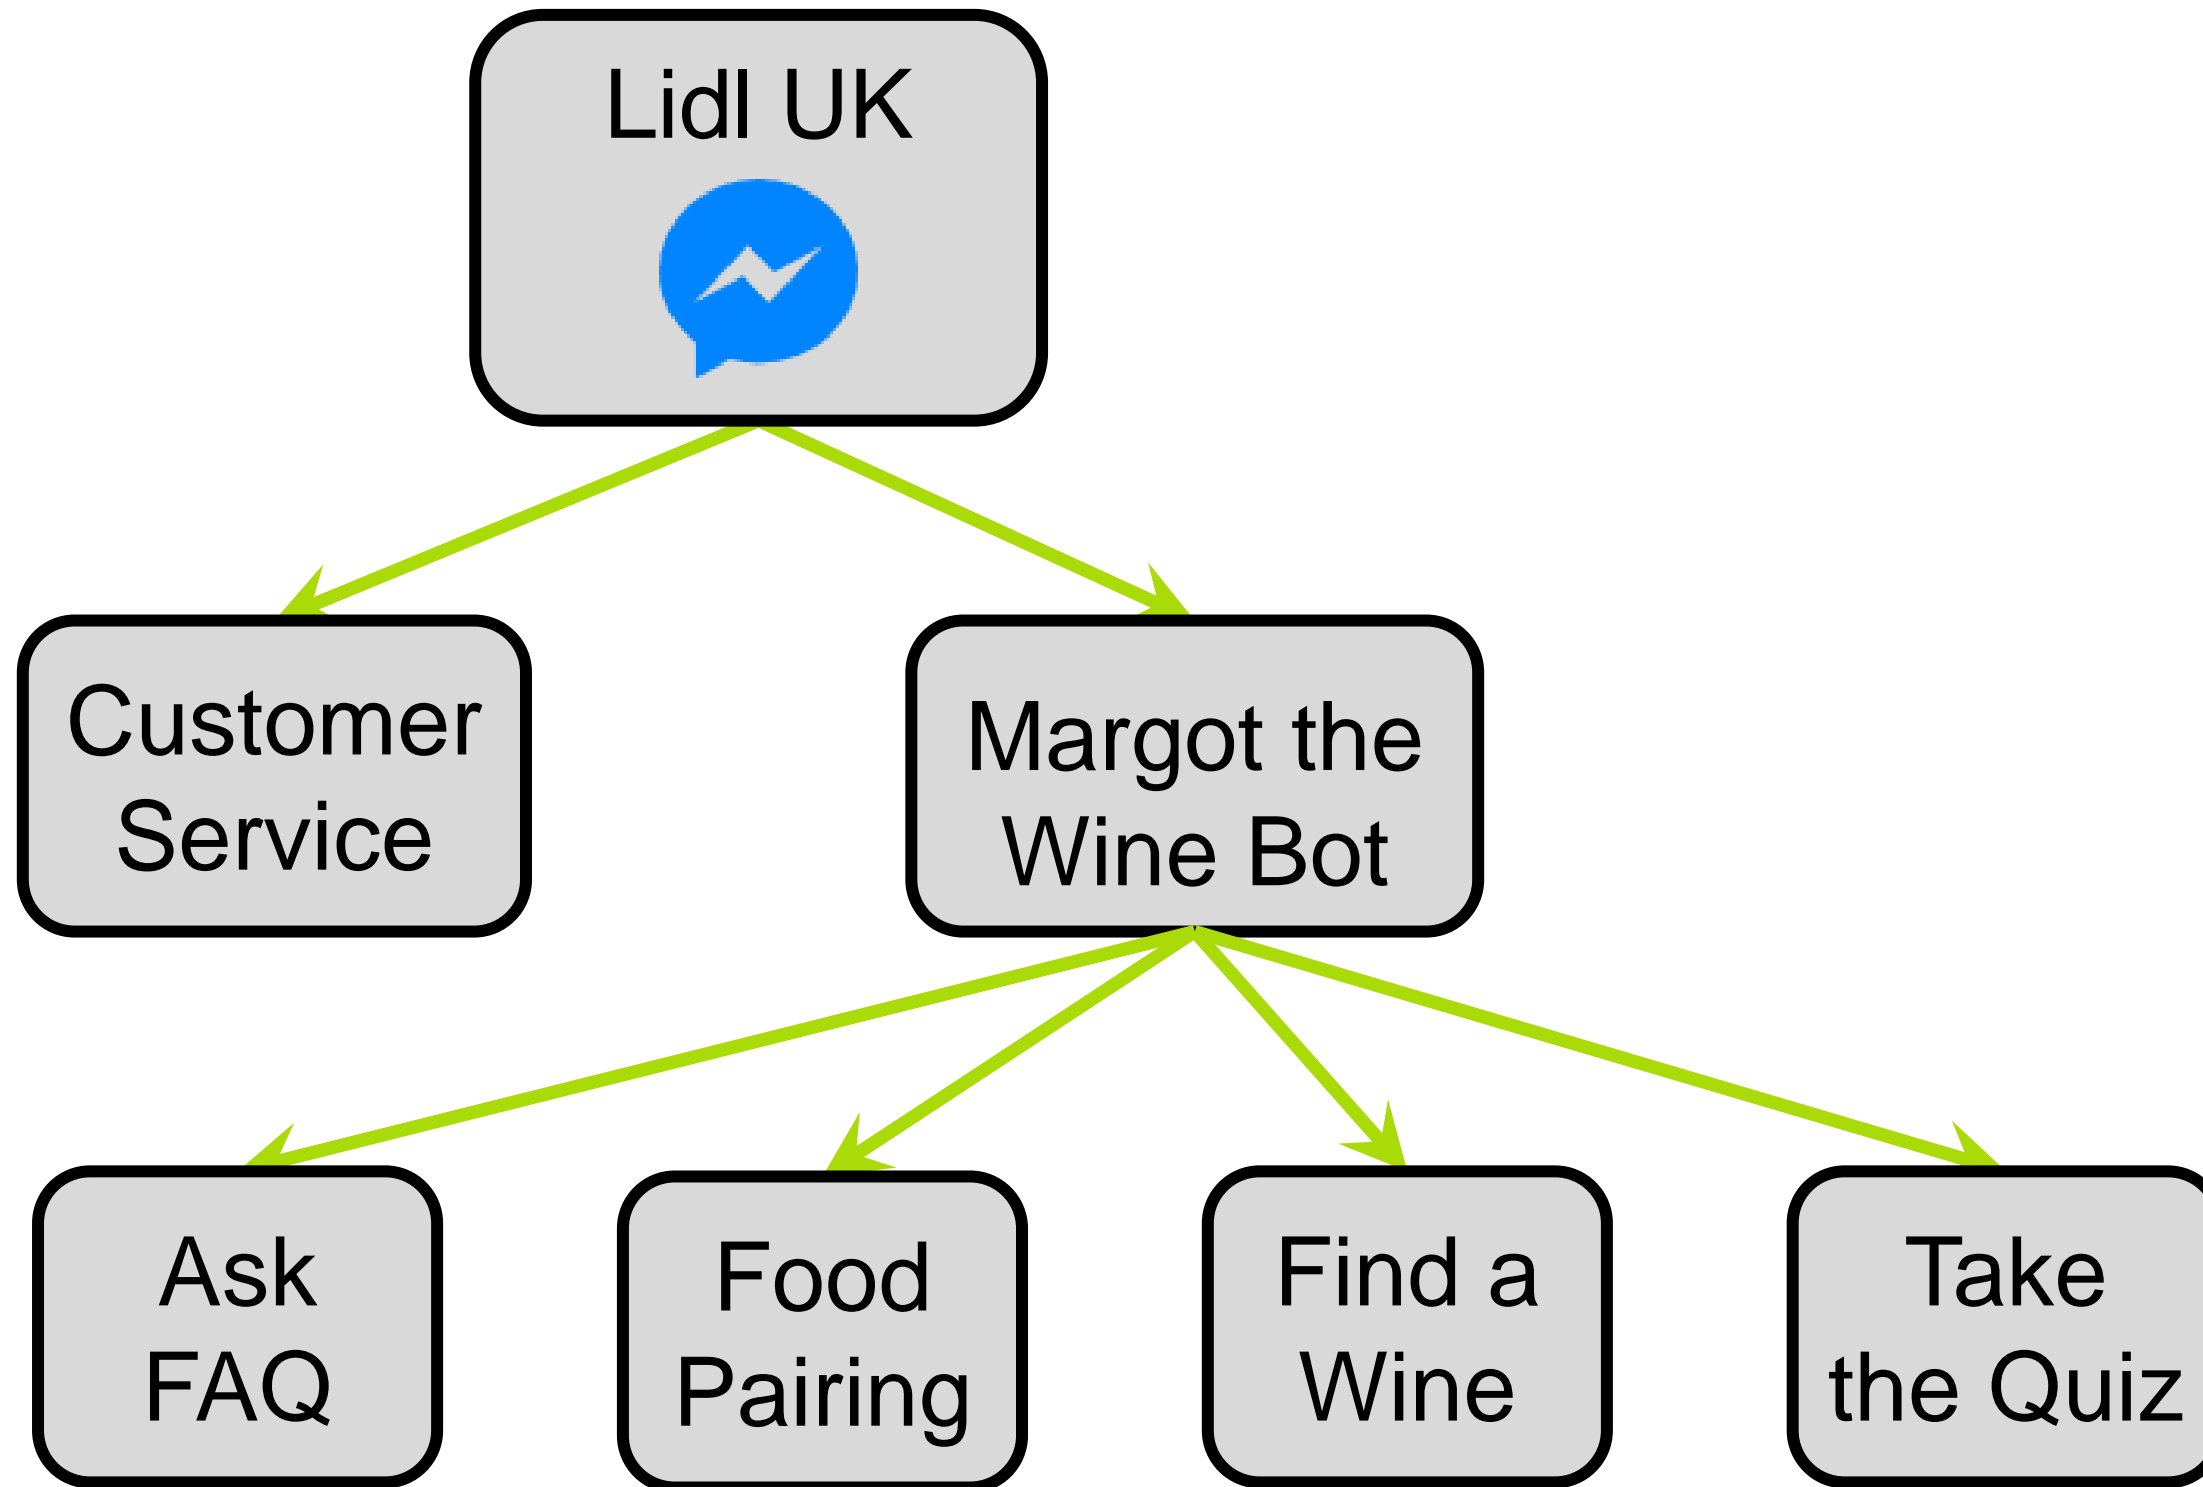

Diverse inputs possible

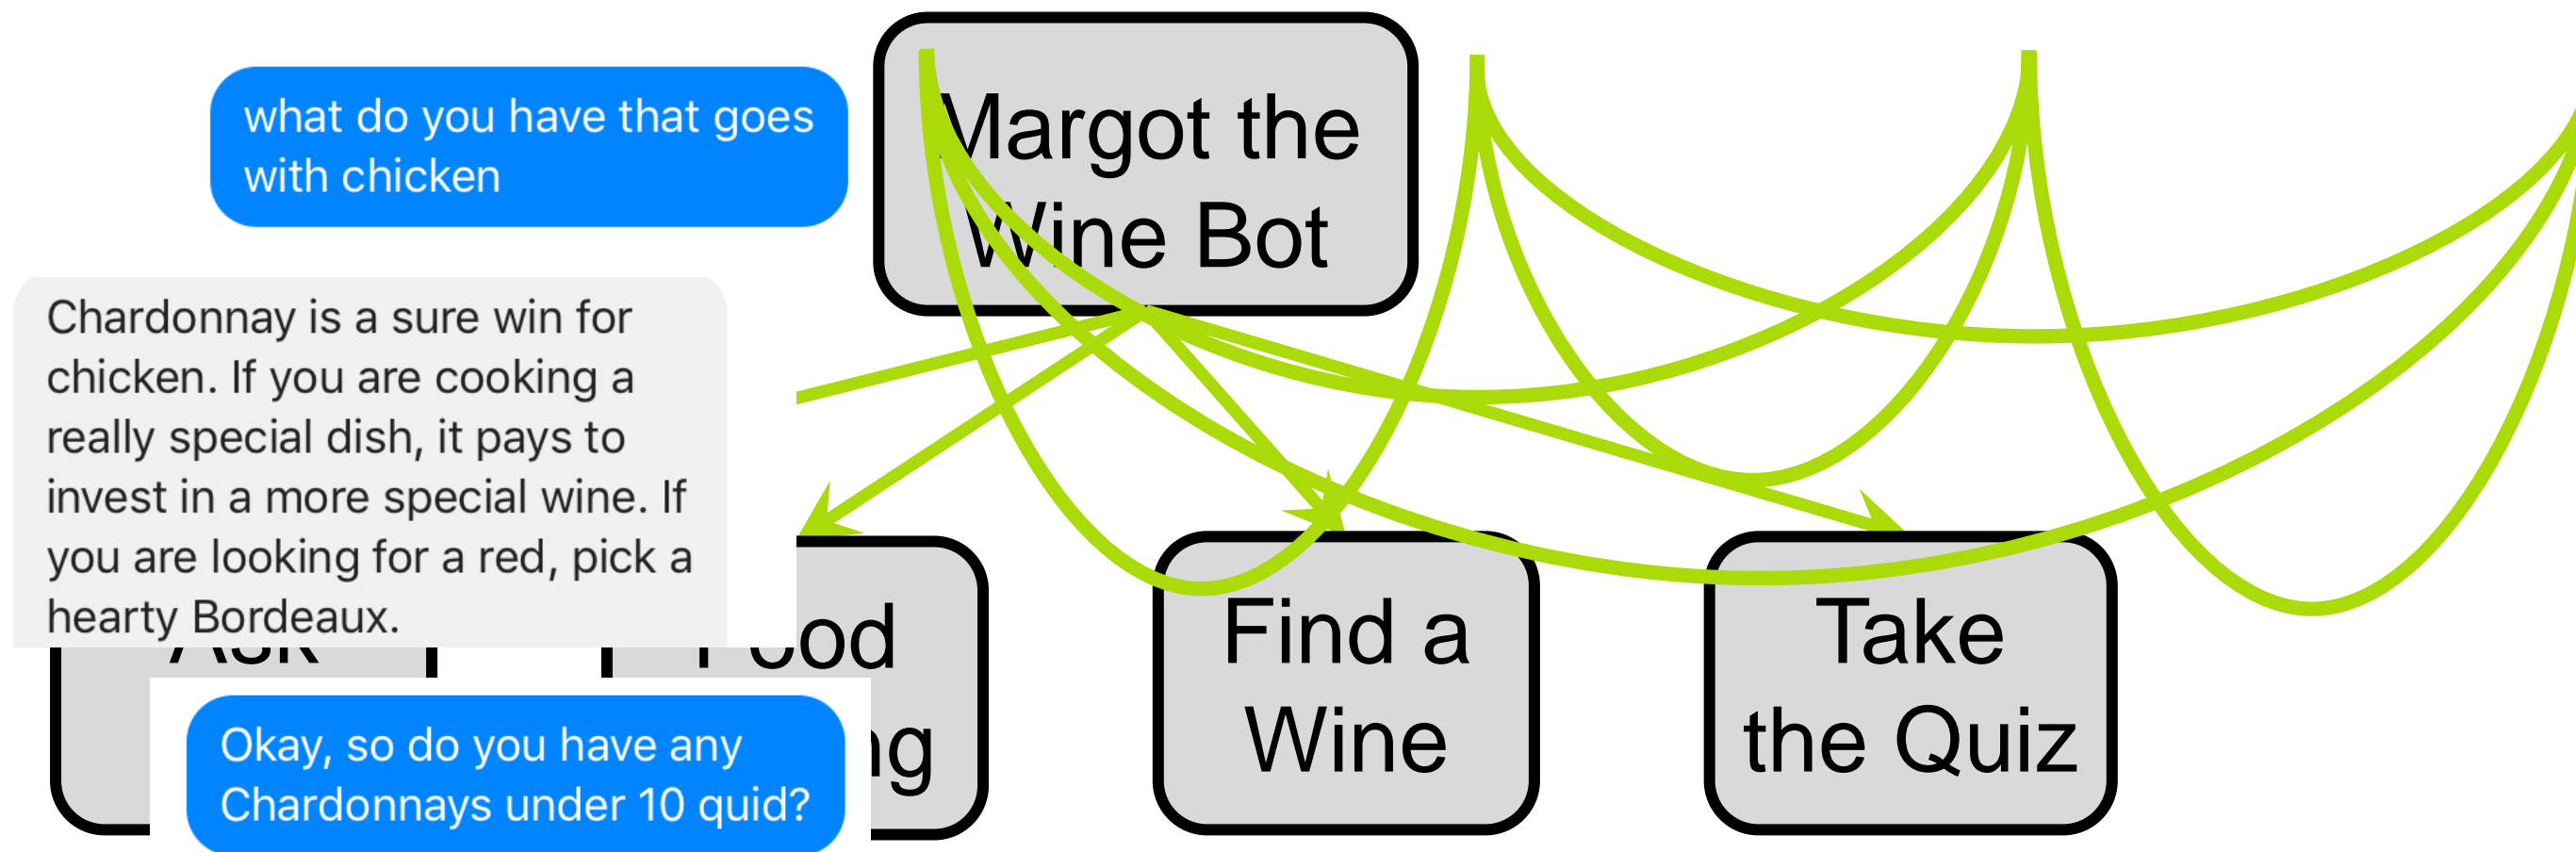

- Buttons
- Emoji
- Individual terms (telegraphic input)
- Full sentences

Any Question, Anywhere

Any Question, Anywhere

Challenges of Natural Language Input

Margot, what pairs with roast chicken?

Domain Ontologies

Challenges: Natural Language Queries

Naturally expressed query

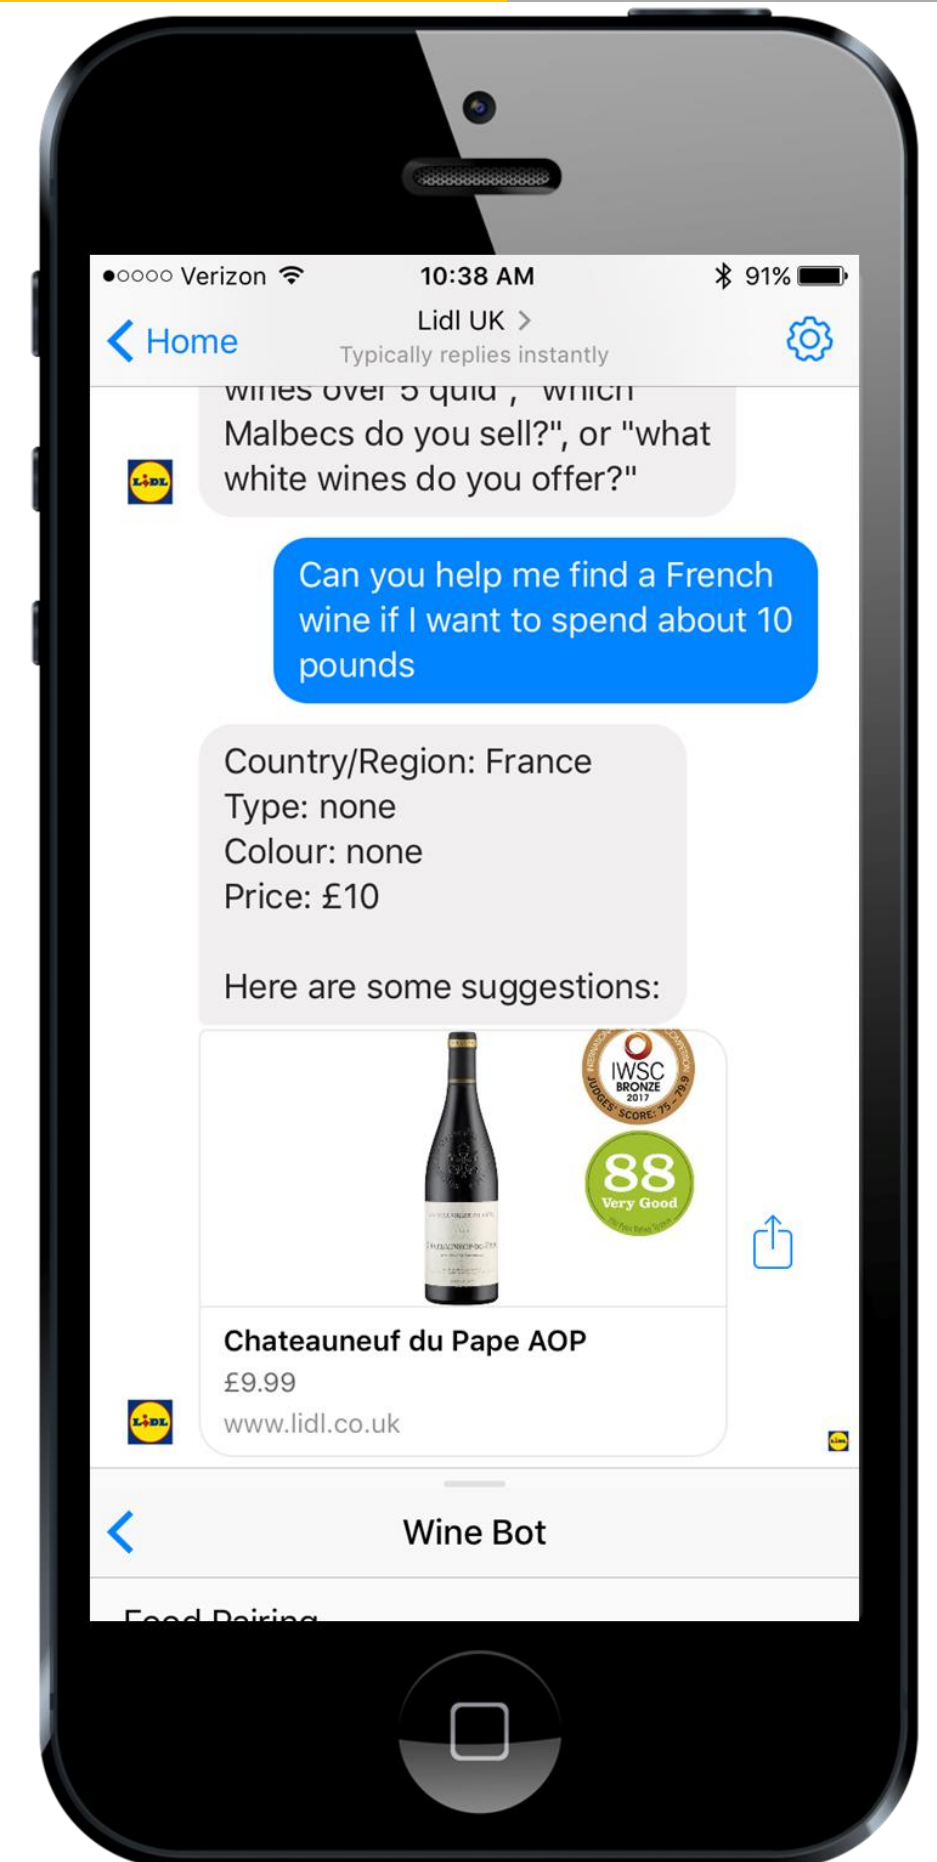

Extracting search parameters

Normalization

Echoing the extraction

Challenges: FAQs

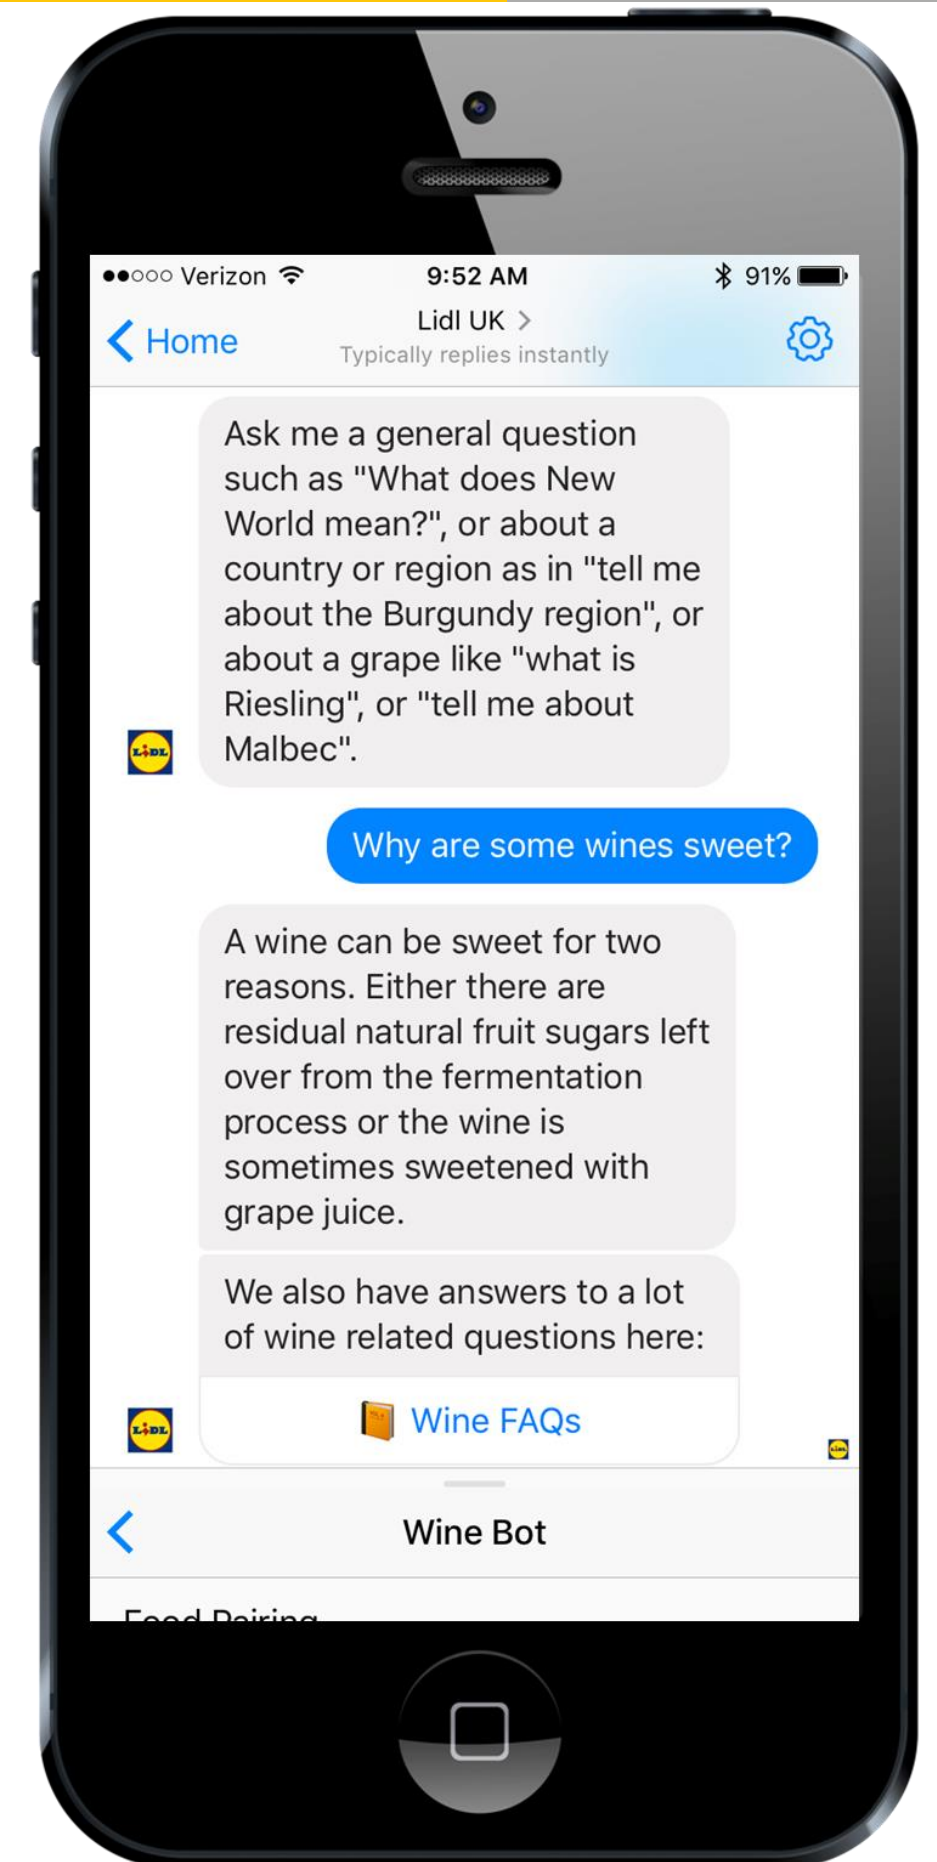

Anticipating customers

What questions will they ask?

How will they ask them?

Determining a Question Set

- Optimizing for the top N
- Pareto Principle
- Data rather than intuition
- Starting small

Variations on a Question

- Age
- Region
- Socioeconomic group
- Language background
- Investment in the task

Crowd-Sourcing the Collection

Internal “Users”

Amazon Mechanical Turk

Crowd-Sourcing the Collection

PROVIDE VARIATIONS TO:

Are pricier wines better?

ANSWERS:

- Are expensive wines better?
- Are expensive wines superior?
- Are cheap wines bad?

Crowd-Sourcing the Collection

“JEOPARDY” APPROACH

“can less expensive wines be good?”

“can cheaper wines be good?”

“are pricey wines better?”

“do better wines always cost more?”

“I want good wine but I can’t afford it”

“does price equal quality?”

“can I buy a good wine for less?”

“does higher price mean better wine?”

**GOOD WINE
ON THE CHEAP**

**PRICE DOESN'T
NECESSARILY EQUAL
QUALITY, AS YOU CAN
FIND SOME REALLY GOOD
DEALS. THE BEST RULE
OF THUMB THOUGH, IS
DRINK WHAT YOU LIKE
AND ENJOY!**

\$400

Challenges: Discourse Flow

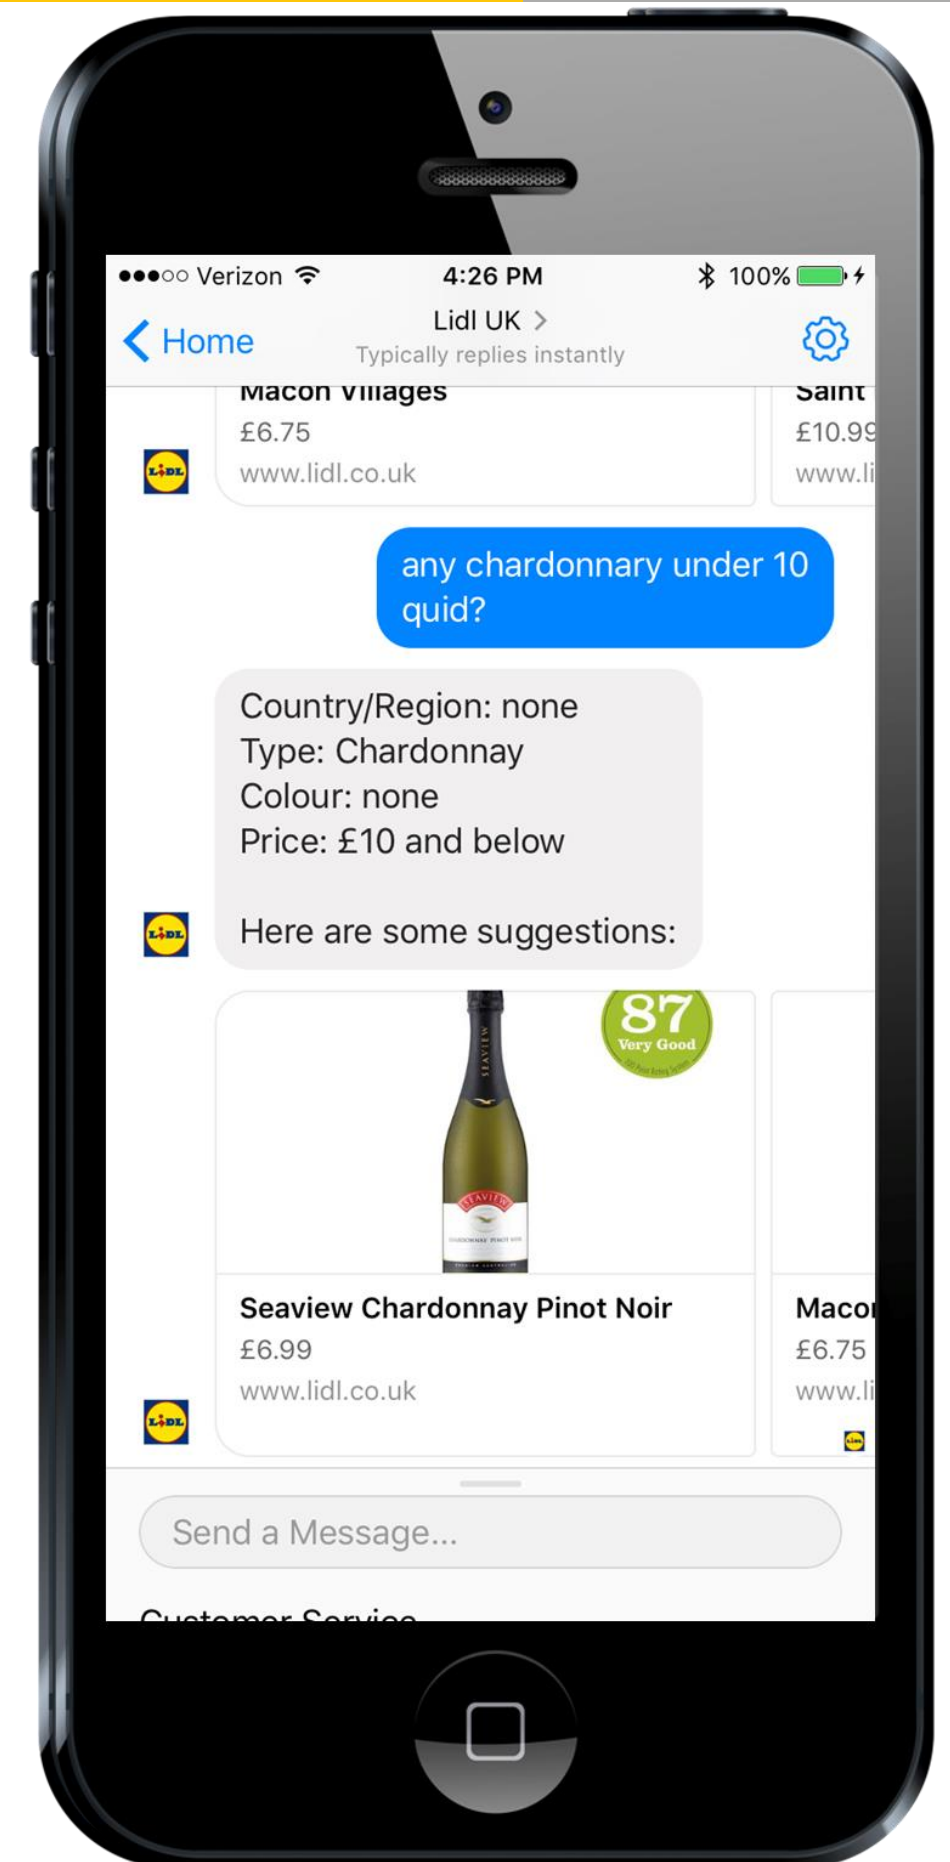

Accommodating every user

- Full sentences vs. telegraphic input

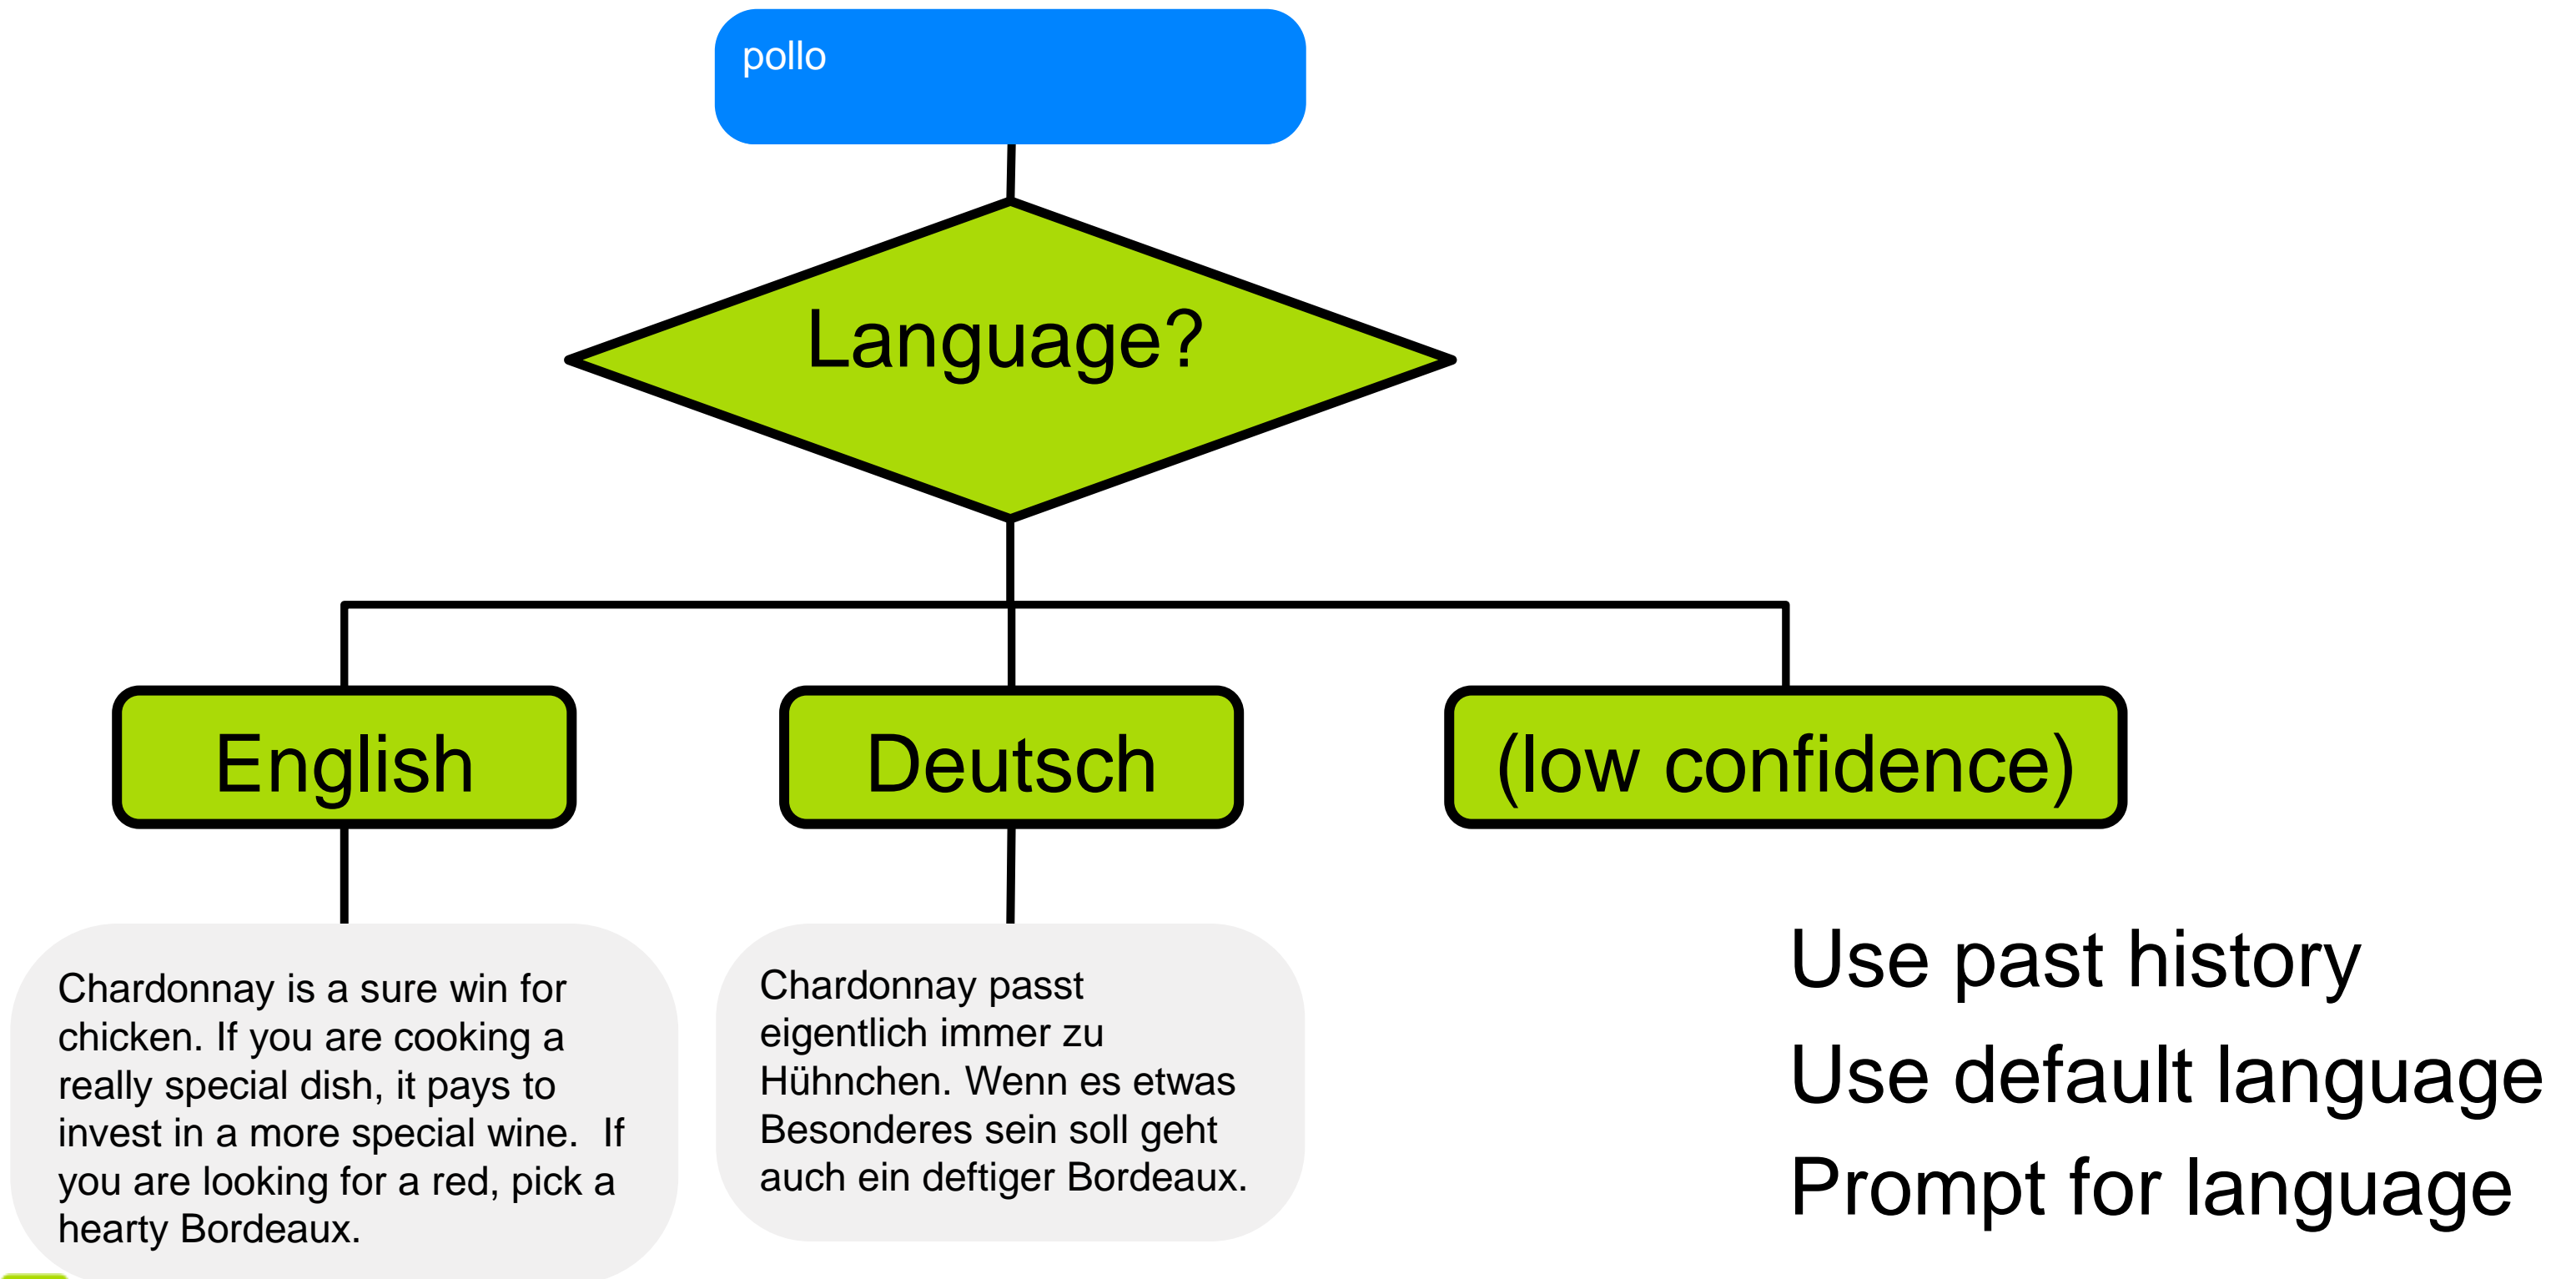

Any question, anywhere

- Natural language ambiguity
- Lack of discourse cues

Challenge: Using the Language of the User

Conclusions: Challenges

Multiple modes of interaction

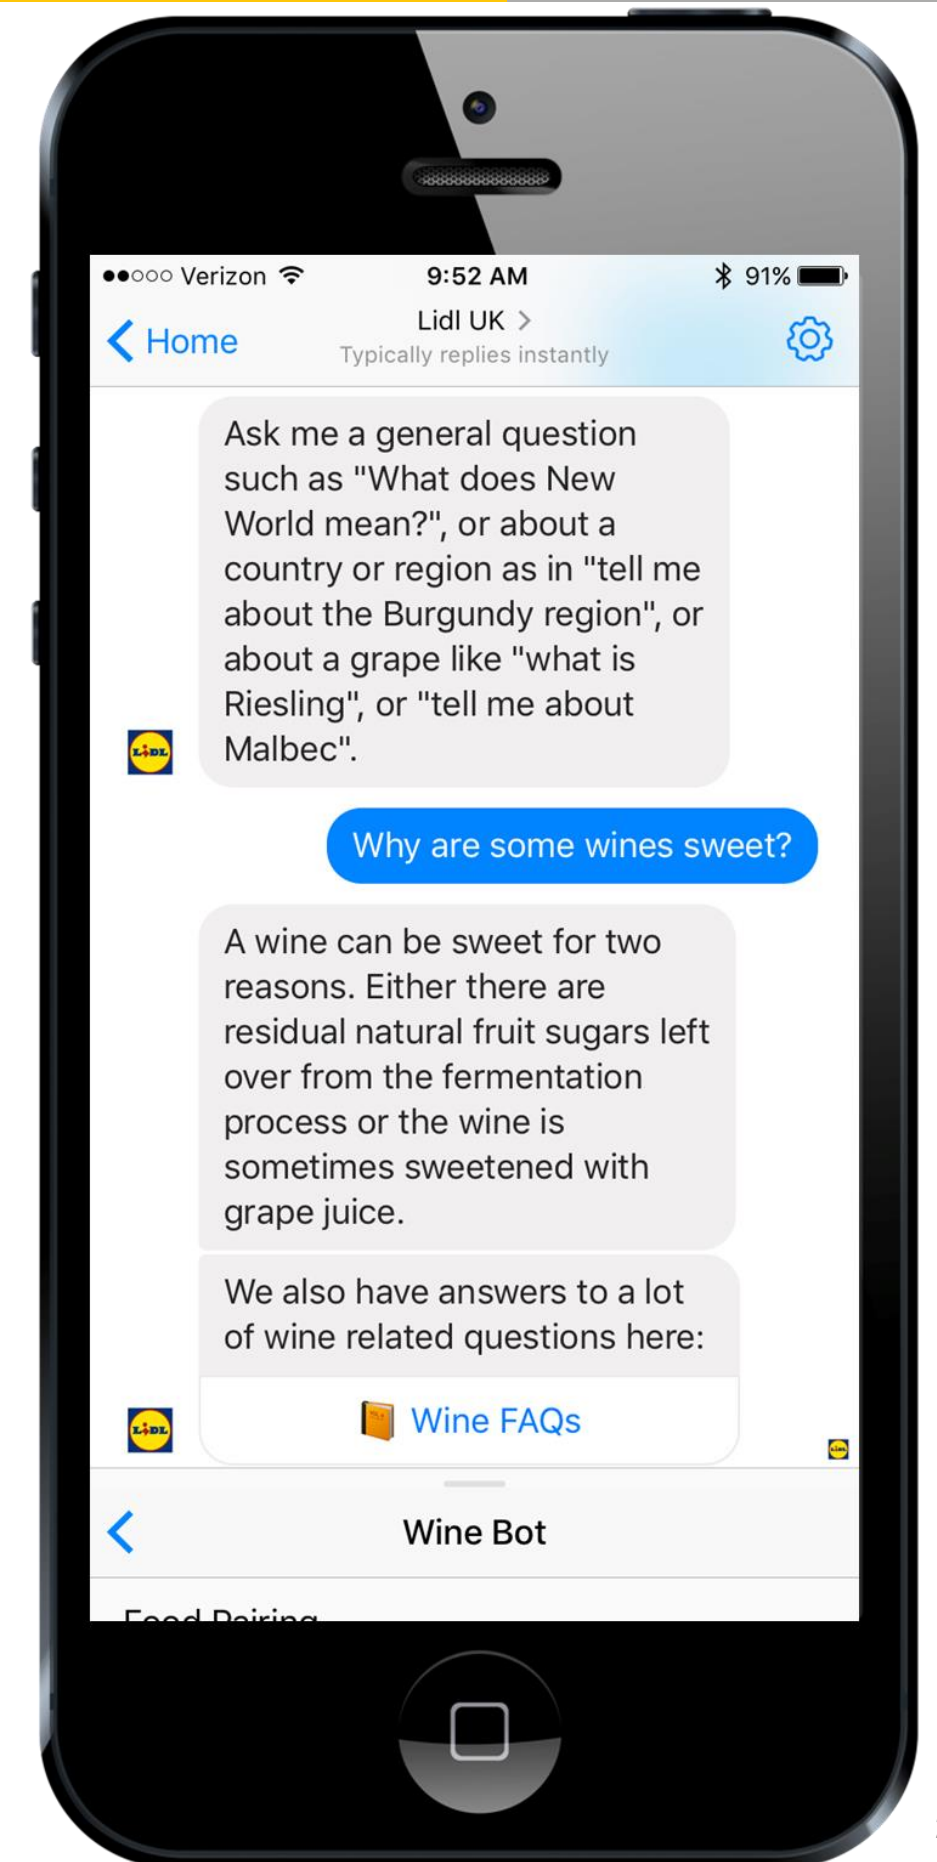

Dialogue flow naturally shifts

Achieving NL coverage

- Linguistic diversity
- Language choice

Conclusions

Try out Margot:
